## SEASON'S GREETINGS FOR 1947

In presenting this new Catalog for dahlias, I wish to thank all my numerous patrons for their past support, and in soliciting continuation of their esteemed patronage to assure them and all new clients that their wishes will always receive my closest personal attention.

This list has been brought right up to date, with the best varieties from all dahlia producing countries, and all novelties have been tried and proven in my garden, and while your local conditions may cause some variation those cataloged can be confidently relied upon, their descriptions being as faithful as possible, and quite unexaggerated.

Do not be discouraged if a variety does not do well with you the first year; try it again as some need to be acclimated.

Look for our new novelties for 1947 imported from Australia and England. You will see them at all the shows this coming year.

Our green plants are grown so as to give the maximum of results of equal or superior to root stock. This is only accomplished by the selection of healthy, vigorous roots benched in a moderate heat that will enable us to take stocky base cuttings.

Only a reasonable number of cuttings are taken and none used that are spindly. After cuttings are rooted and potted and begin to grow, they are moved to cooler quarters and shifted to larger pots. At this stage small tubers are beginning to form, assuring that clumps will be obtained at digging time. The plants are later hardened off in outside quarters so as to withstand shipping and be in good condition for planting out.

We try to keep our list of varieties limited by retaining a very high percentage of those that are placed on the "Honor Roll" consecutive seasons in this country and abroad. The varieties mentioned herein are of exceptional merit and may be grown to your complete satisfaction, if you will dig deep, cultivate regularly, and keep insects under control, particularly the leaf hoffer.

Our plants are all base cutting.

We take great pride in sending healthy, clean, strong plants.

We guarantee all dahlia roots and plants to be in first-class condition when they leave our place, as they are state inspected.

We ship all green plants about May 1st to May 15th. To avoid disappointment order early. Our stock is limited on some varieties. We do not substitute unless requested.

Terms: Cash, or 25 % deposit with order; balance at shipping time. On orders over \$10.00 we pay charges.

Visitors are always welcome to our gardens.

We carry a complete line of annuals in our greenhouse, including the latest novelties. We sell by the dozen or by flats. Don't forget to order some annuals this spring.

Can supply roots of plants listed. Let us know what you need.

### ABBREVIATIONS

FD—Formal Decorative

ID—Informal Decorative

SC—Semi-Cactus

C—Cactus

### 1947 INTRODUCTION

Plants \$ .50

### R. T. RAWLINGS

Clear yellow, of good form, one of the best .....Plants \$ .50

### WHITE CAPS

This was the best white ball dahlia that I saw last season. Wonderful stems.....Plants \$ .50

## SPRAY YOUR DAHLIAS

This is a very important thing in growing dahlias. Spray right away as soon as you plant them and at least twice a week after they are planted, because they can be ruined in one week's time by leaf hoppers, and the results are your plants are stunts. Spray with New Evergreen or Black Leaf 40. You will be well paid for your work.

We use the New Evergreen with great results. For Red Spider we use Selo Cide. And we always spray our plants after sundown.

If we can be of any service to you call us or write us, and we will be glad to advise you.

## OUR REPUTATION

Growers say that we ship our plants the best they have ever seen. Shipped in open crates. You will receive them as fresh as when they leave our greenhouse. Shipped by express. Insured.
